Colombo, Sri Lanka | +94 74 288 9240 | ruwii2020@gmail.com

Profile Summary

Motivated Software Engineering undergraduate with hands-on experience in full-stack development and a strong foundation in programming, database management, and software design principles. Skilled in building responsive web and mobile applications, API integration, and collaborating in team-based environments. Demonstrates strong analytical and problem-solving abilities with a focus on developing efficient, maintainable, and user-centered solutions. Seeking an entry-level Software Developer role to contribute technical expertise and grow within a dynamic organization.

Work Experience

Bank of Ceylon | Technical Project Manager Intern **Nov 2025 – Feb 2026**

- Contributed to the BOC Flex Internet Banking Project**,** supporting the development and enhancement of the bank's digital banking platform.
- Assisted in planning and coordinating project activities while collaborating with developers, QA engineers, and stakeholders**.**
- Performed functional testing, regression testing, and User Acceptance Testing (UAT**)** to ensure system accuracy, security, and reliability.
- Designed and executed test cases**,** documented results, and reported defects**,** working closely with developers to verify fixes.
- Reviewed UI/UX designs using Figma to validate consistency with functional requirements and user experience standards.
- Supported requirement gathering, system analysis, and documentation during different phases of the development lifecycle.
- Participated in Agile/Scrum meetings to track progress, resolve issues, and support timely project delivery.
- Assisted in system enhancements and digital transformation initiatives related to internal and customer-facing banking applications.

Education

BSc. In Computing (Hons) | Current GPA = 3.94 **Sep 2023 - Present**

National Institute of Business Management, Colombo, Sri Lanka

Television & Radio Announcing **Oct 2023 – Dec 2024**

National Institute for Television Training, Sri Lanka

Professional English & IT **Mar 2023 – Jun 2023**

Aquinas College of Higher Studies, Sri Lanka

Core Competencies

Tools & Platforms : Visual Studio, Visual Studio Code, Android Studio, IntelliJ, Docker, Firebase, Apache Hop, Postman, Power BI, Git, XAMPP, Code::Blocks, NetBeans, Jasper Reports, Crystal Reports

Programming Languages : C, C#, Java, Python, PHP, JavaScript

Web Technologies & Frameworks : Node.js, Next.js, React.js, Express.js, FastAPI, Tailwind CSS, Selenium

AI & Data Technologies : spaCy, NLP, PyTorch, Hugging Face Transformers

Databases : MySQL, SQL Server Management, Oracle, MongoDB, PostgreSQL

Architectures & Methodologies : Microservices Architecture**,** REST APIs, Agile, Spring Boot, JWT Architecture

---

Soft Skills

- Teamwork
- Negotiation
- Problem-solving
- Adaptability
- Time management
- Leadership

Projects

Veridex – AI-powered Digital Trust Score Platform - Individual Project

- Designed and developed a full-stack microservices platform to evaluate the credibility of online content using NLP techniques.
- Built a three-service architecture with Next.js frontend, Node.js/Express backend, and Python FastAPI AI service.
- Integrated Hugging Face transformer models (RoBERTa for fake news, sentiment, and emotion analysis) with a spaCy NLP pipeline for entity recognition and linguistic feature extraction.
- Implemented asynchronous processing (202 response + background analysis) with real-time polling for results.
- Engineered a weighted trust scoring system combining multiple signals, with fallback heuristic scoring for high system reliability.
- Applied secure authentication (JWT with refresh token rotation), SSRF protection, and rate limiting for production-grade security.
- Deployed using Docker, Vercel, Railway, and Hugging Face Spaces.

Real-time Message Processing System - 4 Collaborators

- Led a team in developing a queue-based real-time chat platform ensuring prioritized, reliable, and scalable communication using Python.
- Implemented multiple queue structures (Priority, Circular, Batch, Retry, Offline) to enhance throughput and optimize network efficiency.
- Engineered features for priority-based message ordering, automatic retry for failed transmissions and batch delivery to improve performance.

Healthcare Appointment System - 5 Collaborators

- Built a microservices-based application using Spring Boot**,** React and MySQL for doctor–patient management.
- Developed Patient, Doctor, Appointment and Payment services with RESTful APIs and secure authentication.
- Implemented appointment booking, schedule management and payment processing with a responsive React interface.

Certifications

Python Programming **Apr 2025**
Certificate ID: Z7efZx1RD7

Postman API Fundamentals Student Expert **May 2025**
Certificate ID: https://badgr.com/public/assertions/gk8fHSeFQ0iikM_8A-SG0w

Multicloud Network Associate **Oct 2025**
Certificate ID: 2025-28284

Android Apps Development Masterclass **May 2025**
Certificate ID: ude.my/UC-c34096bb-73f5-4bdf-8ea8-e64007672e07

Microsoft Azure AI Essentials Professional Certificate **May 2025**
Certificate ID: d882f27c2855c4ceedb3de5202cbaee28e7f75987c8856a101ca266051edf7fb
